

UNMATCHED

Quality and Curb Appeal of Concrete Roof Tile

QUALITY

Since 1989, Eagle Roofing Products has been manufacturing beautiful, top of the line concrete roof tile products designed to bring you peace of mind by protecting homes and businesses alike. Our tiles can withstand the harshest of weather conditions and are tested to the highest standards in the industry.

DURABILITY

When installed properly on a roof, Eagle tile:

- Offers a **Class A** fire covering
- Allows for a **Class 3 or 4** hail rating due to its tough impact resistance
- Can withstand sustained winds up to **180mph**
- Pass freeze-thaw requirements (excludes slurry tiles)

Outperforming many other roofing materials, this testing is mandated to ensure that an Eagle tile roof will keep any structure safe.

LONGEVITY

With proper maintenance and high-quality components, a concrete tile roof can last the life of the building it is on.

Due to its long life-span, the need to reroof your structure over time is greatly reduced making it one of the best and most-cost effective roofing systems.

LIFE-SPAN

The life expectancy of an Eagle tile roof?

DESIGN VERSATILITY

From gorgeous high and medium barrel tiles to distinguished flat profiles, concrete roof tile's design versatility allows for a variety of multifaceted shapes and surface textures meant to emulate clay, wood shake and natural slate.

Eagle also offers a plethora of harmonious colors, such as subtle, monochromatic shades, stunning ranges and vivacious blends. Aesthetically pleasing, our products complement any architectural style, both residential and commercial.
